INDEX OF AUTHORS

Bang, B., 20, 341.
Barger, E. H., 468.
Barger, J. A., 842.
Barnes, M. F., 901.
Beach, B. A., 367.
Biester, H. E., 34, 1003.
Bleecker, Wm. L., 618.
Bullard, J. F., 511.
Bundesen, Herman M., 810.
Carlson, E. R., 889.
Church, H. R., 901.
Coon, Chas. J., 627.
Cotton, Chas. E., 875.
Craig, R. A., 588.
Cross, Floyd, 611.
Day, L. Enos, 782.
Dimmock, W. W., 511.
Dorset, M., 363.
Doyle, L. P., 491, 585.
Dunlap, G. L., 594.
Eichhorn, Adolph, 1023.
Evans, W. A., 696.
Faulder, E. T., 771.
Feist, A. A., 521.
Fitch, C. P., 636.
Fox, Herbert, 792.
Frank, E. R., 327, 336.
Giltner, L. T., 919.
Grossman, Mrs. James D., 658.
Hagan, W. A., 355.
Hall, Maurice C., 716, 946.
Hays, C. H., 880.
Healy, Daniel, 511.
Henley, R. R., 363.
Hinshaw, W. R., 594, 599, 756.
Huddleson, I. Forest, 889.
Iverson, J. P., 764.
Jones, F. S., 462.
Jungherr, Edwin, 317.
Knapp, J. V., 932.
Knilans, Arthur J., 819.
Kolmer, John A., 459.
Lane, W. H., 517.
Lash, Elmer, 148, 150.
Little, Ralph B., 462.
Lochead, D. C., 823.
Lubbehusen, R. E., 636.
McDonald, W. A., 940.
McLeod, W. M., 327.
McNutt, G. W., 286.
McNutt, S. H., 34, 1003.
Mathews, F. P., 491.
Mayo, N. S., 665.
Mitchell, Chas. A., 108.
Mohler, J. R., 558, 990.
Moskey, H. E., 363.
Murphy, O. C., 813.
Murray, Chas., 34, 1003.
Newsom, I. E., 611.
Payne, L. F., 599, 756.
Pearson, Raymond A., 26.
Purwin, Paul, 34, 1003.
Rich, T. S., 787.
Rogers, J. Allyn, 1073.
Rosenow, Edward C., 419.
Runnells, R. A., 90.
Sanders, D. A., 568.
Schalk, A. F., 852.
Schilling, S. J., 300, 618.
Scott, H. M., 599, 756.
Seagraves, Chas. H., 106.
Sigler, T. A., 12.
Smith, H. R., 846.
Stafseth, H. J., 745.
Stanton, L. E., 370.
Still, S. H., 938.
Stotchik, J., 650.
Stubbs, E. L., 631.
Thorp, Frank, Jr., 90, 745.
Torrey, J. P., 889.
Turner, Henry W., 1061.
Turner, John P., 348.
Ufford, O. C., 611.
Watson, E. A., 145.
Welch, Howard, 317.
Whiting, R. A., 491, 721.
Wight, A. E., 864.
Williams, W. W., 1070.
Wilson, H. A., 731.
Wisnicky, W., 367.
Woodcock, E. F., 475.
Wright, H. K., 1036.

LIST OF ILLUSTRATIONS

STUDIES IN INFECTIOUS ENTERITIS OF SWINE, 34.

Fig. 1. Infectious enteritis. (Field case.) Ileum, 67.
Fig. 2. Infectious enteritis. (Experimentally induced.) Cecum, 68.
Fig. 3. Infectious enteritis. (Experimentally induced.) Cecum, 69.
Fig. 4. Infectious enteritis. (Field case.) Extremely heavy zone of caseation necrosis, 70.
Fig. 5. Infectious enteritis. (Experimentally induced.) Cecum, 71.
Fig. 6. Infectious enteritis. (Field case.) Cecum, 72.
Fig. 7. Infectious enteritis. (Field case.) Cecum, 72.
Fig. 8. Infectious enteritis. (Field case.) Cecum, 73.
Fig. 9. Infectious enteritis. (Experimentally induced.) Cecum, 73.
Fig. 10. Infectious enteritis. (Experimentally induced.) Cecum, 74.
Fig. 11. Infectious enteritis. (Experimentally induced.) A, large colon; B, small colon, 75.
Fig. 12. Infectious enteritis. Large colon, 76.
Fig. 13. Infectious enteritis. (Experimentally induced.) Large colon, 77.
Fig. 14. Infectious enteritis. (Experimentally induced.) Large colon, 78.
Fig. 15. Infectious enteritis. (Experimentally induced.) Large colon, 78.
Fig. 16. Infectious enteritis. (Experimentally induced.) Large colon, 79.
Fig. 17. Infectious enteritis. (Experimentally induced.) Large colon, 79.
Fig. 18. Infectious enteritis. (Field case.) *Balantidium coli* in necrotic areas, 80.
Fig. 19. Infectious enteritis. (Field case.) *Balantidium coli* in exudate, 81.
Fig. 20. Active or primary invasion of human intestine by *Balantidium coli*, 82.
Fig. 21. *Balantidium coli* in section of human intestine, showing marked invasive power, 82.
Fig. 22. Infectious enteritis. (Experimentally induced.) Large colon, 83.
Fig. 23. Infectious enteritis. (Experimentally induced.) Small colon, 84.
Fig. 24. Infectious enteritis. (Field case.) Cecum, 85.
Fig. 25. Infectious enteritis. (Field case.) Small colon, 85.
Fig. 26. Infectious enteritis. (Experimentally induced.) Small colon, 86.
Fig. 27. Infectious enteritis. (Experimentally induced.) Small intestine, 87.
Fig. 28. Human typhoid fever. Intestine, 88.
Fig. 29. Human typhoid fever. Intestine, 88.

PHOTOGRAPH, PROMINENT VETERINARIANS AT PHILADELPHIA, 141.

PHOTOGRAPH, A SECTION OF THE WOMEN'S AUXILIARY, 269.

THE CORPUS LUTEUM OF PREGNANCY IN THE DOMESTIC COW (BOS TAURUS) AND A BRIEF DISCUSSION OF CYCLICAL OVARIAN CHANGES, 286.

Fig. 1. Photomicrograph of corpus luteum from cow carrying a 6-mm. fetus; about 25 days pregnant (Ac. No. 101), 295.
Fig. 2. Corpus luteum from non-pregnant cow, 10½ days after onset of heat (Ac. No. 66), 295.
Fig. 3. Same as fig. 1, but low magnification, 296.
Fig. 4. Same as fig. 2. x 100, 296.
Fig. 5. Corpus luteum from a cow carrying a 57-cm. fetus; pregnant about 6 months (Ac. No. 27), 297.
Fig. 6. Corpus luteum from a cow carrying an 85-cm. fetus; near end of term (Ac. No. 21), 297.
Fig. 7. Corpus luteum from a cow pregnant 21 days (Ac. No. 81), 298.
Fig. 8. Same tissue as fig. 7, 298.
Fig. 9. Corpus luteum from a cow pregnant 32 days; 10-mm. fetus (Ac. No. 80), 299.
Fig. 10. Corpus luteum from a cow carrying a 40-cm. fetus, pregnant about 5½ months (Ac. No. 85), 299.

A REPORT ON LAMB DISEASES, 317.

Fig. 1. Coccidia from lamb manure. x 336, 321.

A PRELIMINARY REPORT REGARDING EPIDURAL ANESTHESIA IN EQUINES AND BOVINES, 327.

Fig. 1. Lateral view of a portion of the vertebral column with the canal opened, 328.
Fig. 2. Lateral view of a portion of the vertebral column showing the terminal part of the dura mater and cauda equina, 330.
Fig. 3. Position and direction of the needle for epidural injection, 332.

Fig. 4. The first noticeable indication of epidural anesthesia, 333.
Fig. 5. A further stage of epidural anesthesia, 334.

Regional Anesthesia in the Dog and Cat, 336.
Fig. 1. Antatomical structures involved in the dog, 337.
Fig. 2. Characteristic position during complete epidural anesthesia, 338.
Fig. 3. Castration of unrestrained dog following epidural anesthesia, 339.

Dermoid Cyst in Testicle of a Monorchid Colt, 367.
Fig. 1. Diseased testicle at left; normal, at right, 368.
Fig. 2. Diseased testicle incised, showing contents, 369.

Bacteriologic Studies on the Etiology of Periodic Ophthalmia in the Horse, 419.
Fig. 1. Drawing of eyes of rabbits, 431.
Fig. 2. Fibrinous exudate in lower part of anterior chamber of the eyes of horse 54,433.
Fig. 3. Condition of inoculated eye (top) and uninoculated eye (bottom) of horse 45, 434.
Fig. 4. Edema and cellular infiltration of ciliary body of the eye of horse 702, 435.
Fig. 5. Higher magnification of a small area shown in figure 4, 435.
Fig. 6. Section through ciliary body of affected eye shown in figure 3, 437.
Fig. 7. Higher magnification of a small field shown in figure 6, 437.
Fig. 8. Single diplococcus in the wall of a capillary, free in the tissue, and in short chains and clumps in the section shown in figure 4, 439.
Fig. 9. Bacilli alone and together with small and large diplococci and cocci in the lesions of the eye of horse 702 shown in figures 4 and 5, 439.
Fig. 10. Bacilli and diplococci of different sizes, isolated from the turbid aqueous humor of the inoculated eye shown in figure 3, 439.
Figs. 11, 12, 13. Drawings of eyes of rabbits 2017, 2058 and 2024 (table VII), injected five hours before with a 24-hour broth culture of the bacillus isolated from the eye of horse 702, 453.
Fig. 14. Drawings of eyes of a rabbit injected five hours before with a 24-hour broth culture of the bacillus, 454.

Plants of Michigan Poisonous to Live Stock, 475.
Fig. 1. Squirrel-tail grass (*Hordeum jubatum* L.), 479.
Fig. 2. Porcupine grass (*Stipa spartea* Trin.), 480.
Fig. 3. Corn cockle (*Agrostemma githago* L.), 481.
Fig. 4. Water hemlock (*Cicuta maculata* L.), 482.
Fig. 5. St. John's-wort (*Hypericum perforatum* L.), 486.
Fig. 6. Ergot (*Claviceps purpurea* (Fr.) Tul.), 487.
Fig. 7. (Left) Poison ivy (*Toxicodendron toxicodendron* L.), 489.
(Right) Poison sumac (*Toxicodendron vernix* (L.) Kuntze), 489.

Anemia in Young Pigs, 491.
Fig. 1. Chart of curves showing the average red blood-cell and hemoglobin content of the blood of anemic and non-anemic pigs between the ages of 16 and 90 days, 493.
Fig. 2. Chart of curves showing the average weights of anemic and non-anemic pigs between five and 95 days of age, 495.
Fig. 3. The survivors in an anemic litter, 496.
Fig. 4. The liver from an anemic pig, 498.
Fig. 5. A cross-section of the liver from an anemic pig, 499.
Fig. 6. Photograph showing a comparison between the size of a normal spleen and an enlarged one from an anemic pig, 500.
Fig. 7. Cross-sections of spleens from anemic (A) and non-anemic (B) pigs, 501.
Fig. 8. Photomicrograph of a section of liver from an anemic pig under low magnification, showing the remarkable extent to which the degenerative fatty infiltration has replaced the liver parenchyma, 502.
Fig. 9. Photomicrograph of a section of liver from an anemic pig, under high power, 502.
Fig. 10. Photomicrograph of a section of spleen from an anemic pig, 505.
Fig. 11. Photomicrograph of a section of liver from an anemic pig, 505.
Fig. 12. Photomicrograph of a section of liver from a pig which had recovered from anemia so far as the blood picture was concerned, 507.
Fig. 13. Photomicrograph of a section of bone from an anemic pig, 507.

Acidosis of Pregnant Ewes: So-Called Pregnancy Disease of Sheep, 511.
Fig. 1. 1 cc N/50 HCl per 1 cc plasma (CO_2 exhausted), 515.

Portrait, Major R. A. Kelser, 526.

Portrait, Dr. Gustaf Kjerrulf, 529.

Manson's Eyeworm of Poultry, 568.
Fig. 1. Larvae of Manson's eyeworm, taken from body of cockroach, 575.
Fig. 2. Adult Manson's eyeworm, 575.
Fig. 3. The intermediate host of Manson's eyeworm, the cockroach, 576.

Further Studies on Dissemination of Salmonella Pullorum Infection in Incubators, 599.
Fig. 1. Ovaries of birds 8419 and 252, 607.
Fig. 2. Ovary of bird 1267, 608.

On the Accuracy of the Agglutination Test for Bacterium Pullorum Infection as Shown by Repeated Tests on the Same Birds, 611.
Fig. 1. Residual yolk masses in White Leghorn baby chicks at 72 hours, 619.
Fig. 2. Residual yolk masses in White Leghorn baby chicks at 5 days, 620.
Fig. 3. Residual yolk masses in White Leghorn baby chicks at 7 days, 621.

Cartoon, Wonder What Kind of Human Race We Could Develop, 626.

Portrait, Dr. A. W. Miller, 657.

Portrait, Prof. C. O. Jensen, 660.

Portrait, Dr. E. C. Schroeder, 684.

Swine Dysentery, 721.
Fig. 1. Early stage of dysentery showing hyperemia and hemorrhagic exudate of colon mucosa, 723.
Fig. 2. Vibrios which occur commonly in the colons of dysentery pigs, 724.
Fig. 3. Colon mucosa showing necrosis and diphtheric plaques, 725.
Fig. 4. Late stage of dysentery showing atrophy of epithelium and diphtheric exudate of superficial portion of colon mucosa, 726.

The Relation of the Agglutination Test to the Presence of Brucella Abortus in the Body of the Bovine, 889.
Fig. 1. Upper row—reaction after fifteen-second period. Middle row—reaction after two-minute period. Lower row—after mixing, 894.

Portrait, Dr. M. F. Barnes, 982.

Portrait, Dr. E. C. Deubler, 982.

The Veterinary Situation at Washington, 990.
Chart 1. Opportunities for advancement, 991.
Chart 2. Ages of B. A. I. veterinarians, 993.
Chart 3. Graduates of accredited veterinary colleges, 995.
Chart 4. Civil service examinations for veterinarians, 997.
Chart 5. Nature of veterinary duties, 999.
Chart 6. Turnover of veterinarians, 1001.

Studies on Infectious Enteritis in Swine, 1003.
Fig. 1. Large colon, 80 hours after feeding culture.
Fig. 2. Anterior large colon, 128 hours after feeding culture.
Fig. 3. Small mesenteric lymph-node, 32 hours after culture feeding.
Fig. 4. Small mesenteric lymph-node, 88 hours after culture feeding.
Fig. 5. Cecum, 32 hours after culture feeding.
Fig. 6. Cecum, 56 hours after culture feeding.
Fig. 7. Cecum, 104 hours after culture feeding.
Fig. 8. Cecum, 104 hours after culture feeding.

Johnin as a Diagnostic Agent in Paratuberculosis, 1036.
Fig. 1. Bottle showing surface growth, 1041.
Chart I. Reaction of cow infected with Johne's disease, 1044.
Chart II. Reaction of supposed normal cow, 1051.
Chart III. Reaction to retest 4½ months after first test, 1052.
Chart IV. Reaction of infected cow, 1054.

New Laboratory of Ashe Lockhart, Inc., 1076.

INDEX OF SUBJECTS

Abstract:

Mercurochrome, Sterilization of Local and General Infections by Intravenous Injection of, 523.

Army Veterinary Service, 113, 267, 373, 528, 653, 1074.

Discoveries and Developments by the Army Veterinary Corps, Recent Important, 526.
Essay Contest, 1928, 1075.
Examination for Appointment in the Veterinary Corps, Regular Army, 653.
Philadelphia, Army Veterinarians at, 25.

Association News:

American Veterinary Medical Association:

Alumni Meetings at Philadelphia, 391.
  Alabama Polytechnic Institute, 391.
  Cornell University, 392.
  Iowa State College, 394.
  New York University, 394.
  Pennsylvania, University of, 395.
  U. S. College of Veterinary Surgeons, 396.
Applications for Membership, 7, 142, 283, 415, 554, 691, 985.
Convention Notes, 140, 149, 279, 397, 510.
Dates Selected, Convention, 413.
Executive Board Election, 1035.
Executive Board of the A. V. M. A., Minutes of Special Meeting of the, 661.
